SCENARIstyler: graphic customisation for all

Duration :1 day, or 2 half-days

This training takes place remotely, in synchronous mode, via a web conference system allowing the use of video, sound, chat and screen sharing (trainee/trainer).

The aim of the training course is to learn how to create new *skins* for web or print generators of a Scenari publishing chain.

Did you know?

SCENARIstyler offers a "form" mode that allows one to create a graphical customisation for the documents of an open source publishing chain without any prerequisites.

Though, if you want to go further into graphic customisation, this training is for you! It is based on guided and free modes.

Prerequisites

- Be familiar with the publishing chain to customise.
- Know the HTML/CSS style principles.

For whom ?

Taget audience : Profil technique.

This training is aimed at computer graphics designers, webmasters... in charge of the graphic design of documents from the Scenari publishing chain.

Objectives

Know how to adapt the graphic designs of documents produced with a Scenari publishing chain.

This training allows you to start your skin modification project in good conditions: you are invited to bring graphic elements, guidelines, vector images... which will allow you to practice immediately.

Programme

The training is divided into two half-days. It is recommended to work on your project between the two sessions.

Session 1

- Presentation of SCENARIstyler and its principles;
- Exploring an example skin with CSS;
- Presentation of the structure of the CSS of the publishing chain to be styled;
- Experimentation (handling).

Session 2

- Questions and answers;
- Further styling;
- Presentation of the print skin principle and its modification;
- Skin packaging, choice of version numbers.

OpenDocument support

Depending on your needs, this training can go deeper into the styling of the OpenDocument type document.

Pedagogy and tools

Training principles

The training is practice-oriented: the manipulation of SCENARIchain and its extension SCENARIstyler through exercises.

Tools

- The *wsppacks* of your publishing chain or of an open source publishing chain,
- SCENARIchain and the extension SCENARIstyler.

Animation

A trainer can assist **a maximum of four trainees** during the training course.
